TECHNICAL EXPERTISE

- React / Next.js Frameworks
- Tailwind CSS Utility Framework
- HTML5 / CSS3 (Flexbox & Grid)
- Vanilla JavaScript (ES6+ DOM)
- Mobile-First Responsive Design
- Hybrid App Architecture (Cordova)
- Git / Version Control Pipelines
- UI/UX Layout Strategy

PROFESSIONAL PROFILE

Driven Frontend and Mobile Application Developer with a proven record of translating wireframes into clean, high-performance, and visually premium digital experiences. Adept at engineering interfaces using React, Next.js, and Tailwind CSS, building native-behaving hybrid architectures, and collaborating effectively within agile tech startup environments.

PROFESSIONAL EXPERIENCE

Frontend Developer Intern

May 2026 – Present

F-Bridge Africa (Remote)

- Collaborate within an active development team environment to engineer and deliver responsive web interface components.
- Translate UI/UX wireframes into scalable, semantic HTML, CSS, and interactive JavaScript features.
- Utilize Git version control workflows to pull, manage, and merge shared code repositories throughout sprints.

Founder & Lead UI Developer

Jan 2026 – Present

Geypey Web Studio (Freelance)

- Architect modern custom web solutions and intuitive administrative layout interfaces for independent brands.
- Implement clean, component-focused responsive design patterns that maximize mobile viewport navigation metrics.

KEY PROJECTS PORTFOLIO

Citizens Reporting Mobile Solution

Cross-Platform Hybrid App

Designed and built a mobile-first hybrid crisis-logging application wrapper configured for Apache Cordova. Implemented HTML5 Geolocation API coordinate capture, local database caching logic, real-time categorical incident filtering, and functional user state authorization controls.

Geypey Admin Dashboard

Interface Optimization

Engineered a premium dark-themed data management dashboard utilizing intricate CSS Grid layers and Flexbox alignments. Features dynamic data display rows, custom interactive modals, and fluid mobile-first breakpoints.

Ancient Knowledge Hub

Content Discovery Platform

Architected a digital archive and discovery engine dedicated to ancient mysteries, mythology, and historical research. Focused heavily on

building media-rich responsive layouts, sleek typography hierarchies, and intuitive multi-category navigation designed for high content retention.

VibePress Entertainment

Frontend Engineering

Developed a high-retention news media platform featuring complex structural grid configurations, elegant typography scaling, and a fully custom responsive vanilla theme toggle.

BACKGROUND & FOUNDATIONS

Secondary School Certificate Examination (SSCE)

Completed

Focused foundation in analytical problem solving, logic workflows, and rapid technical upskilling.

Digital Content Strategist & Creator

"Myths and Mysteries" Channel

Manage community audience retention metrics and script deep narrative structures for independent digital media campaigns.
